

FEATURES

- Allows convenient access to rack mounted equipment.
- Hinge orientation may be vertical or horizontal
- Available in multiple rack sizes
- Solid 1/8" (11 gauge) aluminum
- Attractive black or clear anodized finish
- Available standard rack screws or with thumb screws on swing side
- Customize with your choice of connectors, engraving or silk screening

The RCI Custom Products **HP Series** Rack Mount Hinged Panels are designed to mount in any standard EIA equipment cabinet. Units are made of 1/8" (11 gauge) aluminum and come standard in either black or clear anodized finish (custom colors available). Base size for both H & V models is 2RU, with 1 RU usable area available on the horizontal panel, 2 RU on the vertical. Additional RU may be added in 1 space (1.75") increments. Easy to turn thumb screws (model **TS-1**) are available separately.

Customize the HP Series panels with virtually any connector configuration, engraving, logo graphics or project identifying information.

P/N	Description
Horizontal Panel	
HH	2 RU, horizontally hinged panel. (thumb screws not included)
